

The purpose of this template is to provide a framework for collecting information on the use of the AADL standard language. The AADL team at the Carnegie Mellon<sup>®</sup> Software Engineering Institute intends to use this information to demonstrate AADL adoption and help guide future efforts in support of the standard.

What is your name?

What is the name of the organization using AADL?

What is the name of the organization sponsoring the project in which AADL is used (if different from the name of the organization using AADL)?

What is the name of the project?

Describe the purpose of the project.

What is the size of the project (expressed in dollars or other appropriate currency)?

What is the time period of this project?

Describe why AADL was selected.

How much experience did users have with AADL before beginning this project? If they had not used AADL previously or had only a little exposure to it, how did they gain sufficient skill in its use?

Describe any other standards or other tools (including output tools) used in conjunction with AADL in this project.

Describe any benefits observed from using AADL, including any evaluation or estimate of return-on-investment for the organization(s). The return-on-investment might be expressed as a measurement (e.g., savings of 25%) or it could be anecdotal.

Where (in what location or locations) was this project performed, if different than contact information?

Describe how AADL was used.

Overall, how would you describe this experience with AADL?

What other information, not asked for in this template, would you like to provide?

Please provide the contact information for the project leader or contact person for this project.
